

ASX ANNOUNCEMENT

16 Nov 2022

Belararox to hold investor webinar

The maiden resource estimate and what's next in exploration program

Belararox Ltd (ASX:BRX) (Belararox or the Company), an advanced mineral explorer focused on high value clean energy metals, is pleased to announce that it will be holding an investor webinar on **Friday, 18 November 2022, at 10.30AM AEDT**.

In the webinar, **Belararox Limited's Chairman, Neil Warburton** will provide an overview of:

- The maiden resource estimate for Belara and Native Bee
- Why the resource estimate is a significant milestone in the Company's development
- Next steps in the Company's exploration program
- The upside potential in currently unexplored mineralisation extensions.

The webinar is expected to run for approximately 30 minutes. The presentation will be followed by a Q&A session. Investors are encouraged to send their questions to Belararox Investors email julia@thecapitalnetwork.com.au prior to the webinar. They can also submit questions during the Company's presentation via the chat function.

About Belararox Limited (ASX: BRX)

Belararox is a mineral explorer focused on securing and developing resources to meet the surge in demand from the technology, battery and renewable energy markets. Our projects currently include the potential for zinc, copper, gold, silver, nickel and lead resources.

Projects

Belararox has a 100% interest in the 643 sq.km **Belara Project** located in the Lachlan Fold Belt of New South Wales, where a maiden Inferred Resource of 5.0Mt at a 3.41% ZnEq, including: 1.82% Zinc; 0.33% Copper; 0.63% Lead; 17.5 g/t Silver and 0.21g/t Gold is reported for 2022. The Project includes the historic Belara and Native Bee mines that have been drilled to a depth of around 400 vertical metres and have massive sulphide mineralisation showing excellent continuity and containing significant intersections of zinc, copper, silver, lead and gold. Mineralisation is open along strike and at depth for both Belara and Native Bee with good potential for additional resources to be identified in the next phase of exploration.

Belararox also has a 100% interest in the 49 sq.km **Bullabulling Project** located in the proven gold-producing Bullabulling goldfield near Coolgardie, Western Australia. The Bullabulling Project surrounds the 3Moz Bullabulling Gold Project and is along strike of the Nepean Nickel mine with 3D geology and prospectively mapping already completed and drill targets generated.

Strategy

The Company's has successfully delivered an Inferred Resource 5.0Mt at a 3.41% ZnEq, that is reported in accordance with the JORC Code (2012) over the historic mines at Belara and Native Bee.

A second phase of drilling will assess the potential for extensions to known mineralisation and test for repetitions of massive sulphide mineralisation, with the aim of identifying additional Inferred Resources and an Exploration Target for Belara and Native Bee and to further assess the Project's economic viability.

In addition, regional exploration techniques, both geological and geophysical, as well as new 3D geological models and 3D machine learning assisted computer modelling techniques, will be used to develop and prioritise new regional targets, with the aim of having a pipeline of potential resource targets ready for evaluation.

In addition, the Company will assess any other opportunities within the region that have a strategic fit.
